

Supply Chain Hub

Vendor/Supplier

User Manual for

Vendor 360

Objectives

The goal of this user manual are to:

- To Login SCH Portal and to use Vendor 360.
- View the Performance of Vendor by yearly wise

Target Audience:

- Supplier/Vendor

Course Pre-requisites:

- Understanding of the Performance of Vendor by yearly

Login To SCH Portal

Viewing vendor performance by year

Selecting Year to view the performance

Viewing - Vendor Header Details

Header Page of Vendor - Blocks & Deactivated

DEACTIVATED:

If Vendor status = "Deactivated"
Then Deactivated = Deactivated
Else, Deactivated = "Not Applicable"

PURCHASING BLOCK:

If Vendor status = "Purchase Block"
Then Purchase Block = Blocked
Else, Purchase block = Not Blocked

FINANCE BLOCK:

If Vendor status = "Finance Block"
Then Finance Block = Blocked
Else, Finance block = Not Blocked

Audit Results: **A**

Audit Year: **2020**

Deactivated: **Not Applicable**

Purchasing Block: **Not Blocked**

Finance Block: **Not Blocked**

Note:

The above status are added based on SCH Vendor's status which are not available in Fiori, All other Header block data will match with Fiori

Viewing - yearly wise Performance of vendor by chart

Contractor Safety Chart Formula

SCH FORMULA:

For Contractor Safety chart alone, SCH Percentage calculation is slightly different from SAP Fiori

In Fiori, Score forward accumulation is used for the percentage calculation, whereas in SCH respective year score alone considered for calculation as explained in DEV demo session.

(Eg) Report is executed for Year 2018 to 2020

Fiori (Score for previous years calculated at run time based on the selected year)

- 2020 = Total score for 2020/No of entries for 2020
- 2019 = (Total Score of 2019+2020) / No of entries for 2019
- 2018 = (Total Score of 2018+2019+2020) / No of entries for 2018

SCH:

- 2020 = Total score for 2020/No of entries for 2020
- 2019 = Total score for 2019/No of entries for 2019
- 2018 = Total score for 2018/No of entries for 2018

Explained with screenshots in the following slides

SCH Formula

Report is executed for Year 2018 to 2020

FOR 2020:

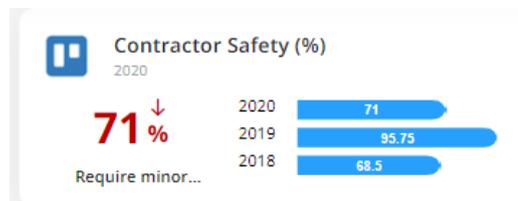

TOTAL SCORE OF 2020
/ TOTAL NUMBER OF
ENTRIES IN 2020

FOR 2019:

TOTAL SCORE OF 2019 /
TOTAL NUMBER OF
ENTRIES IN 2019

FOR 2018:

TOTAL SCORE OF 2018 /
TOTAL NUMBER OF
ENTRIES IN 2018

SAP FIORI Formula

FOR 2020:

TOTAL SCORE OF
2020(CURRENT YEAR) /
TOTAL NUMBER OF
ENTRIES IN 2020
(CURRENT YEAR)

FOR 2019:

TOTAL SCORE OF 2019
+ TOTAL SCORE OF
2020 / TOTAL NUMBER
OF ENTRIES IN 2019

FOR 2018:

TOTAL SCORE OF 2018 +
TOTAL SCORE OF 2019 +
TOTAL SCORE OF 2020 /
TOTAL NUMBER OF ENTRIES
IN 2018

By using this filter and formula we get the 2020 contract safety percentage as like as SCH chart

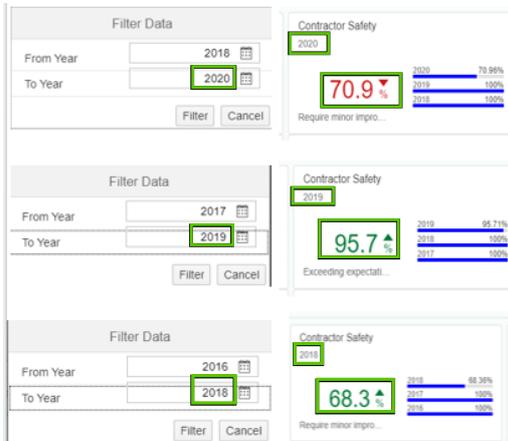

Filter Data	
From Year	2018
To Year	2020
<input type="button" value="Filter"/> <input type="button" value="Cancel"/>	

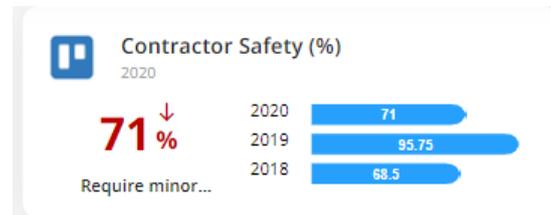

Contractor Safety Chart

FIORI Vs. SCH

Fiore Screenshots:

SCH Screenshots:

Conclusion: Highlighted Fiori values and SCH chart values are matching
